

Ferns and Petals (FNP) Sales Analysis Dashboard – Executive Summary

Project Overview

This project presents a comprehensive **Sales Analysis Dashboard for Ferns and Petals (FNP)**, a leading gifting company specializing in occasion-based products such as flowers, cakes, sweets, soft toys, and personalized gifts.

The objective of this analysis is to uncover key insights related to:

- Sales performance across occasions and months
- Customer purchasing behavior
- Product performance and profitability
- Delivery efficiency
- City-wise demand distribution

The dashboard was built using **Excel (Power Pivot, Pivot Tables, and Data Model)** and provides an interactive view of business performance using slicers for **Occasion and Order Date**.

Key Performance Indicators (KPIs)

- **Total Orders:** 1,000
- **Total Revenue:** ₹35,20,984
- **Average Order Delivery Time:** 5.53 days
- **Average Customer Spending:** ₹3,520.98

Business Insight:

The business demonstrates strong performance in occasion-based gifting with consistent order volume and stable delivery timelines, ensuring a good customer experience.

Key Business Insights

1. Revenue by Occasion

- **Anniversary** and **Raksha Bandhan** are the highest revenue-generating occasions.
- Festive events such as **Holi** and **Diwali** also contribute significantly.
- **Valentine's Day** shows relatively lower revenue, indicating scope for targeted marketing.

 **Insight:** Occasion-driven demand is the primary revenue driver for FNP.

2. Monthly Sales Performance

- Peak revenue months include **February and August**, driven by seasonal festivals and celebrations.
- Lower sales are observed in mid-year months (June–July).

👉 Insight: Strong seasonality exists in customer purchasing behavior.

3. Product Category Performance

- **Colors, Soft Toys, and Sweets** are top-performing categories.
- **Cakes and Plants** contribute moderately.
- Gift-based bundles outperform standalone products.

👉 Insight: Emotional and festive gifting products dominate sales.

4. Top Cities by Orders

- High order volumes are seen in **Imphal, Kavali, Dhanbad, Haridwar, and Dibrugarh**.
- Tier-2 and Tier-3 cities contribute significantly to overall demand.

👉 Insight: Growth is strongly driven by emerging cities rather than only metro markets.

5. Product Performance

- **Magnam Set** and **Quia Gift** are top revenue-generating products.
- Revenue distribution among top products is balanced, reducing dependency on a single SKU.

👉 Insight: Product portfolio is well-diversified.

6. Order Quantity vs Delivery Time

- Slight increase in delivery time is observed with higher order quantities.
- Orders with higher quantities take marginally longer to fulfill.

👉 Insight: Operational efficiency slightly decreases with bulk orders.

7. Revenue by Order Time

- Orders peak during **afternoon and evening hours**.

- Early morning and late-night orders are comparatively lower.

👉 Insight: Customer engagement is highest during mid-day and evening windows.

8. Customer Spending Behavior

- Average customer spends approximately **₹3,520 per order**.
- Indicates moderate to high-value purchasing behavior in gifting segments.

👉 Insight: Strong potential for upselling and premium bundling strategies.

🧠 Overall Business Conclusion

The analysis highlights that FNP's business is heavily driven by **seasonal and occasion-based demand**, with strong performance in festivals and personal celebrations.

Key strengths:

- Strong revenue consistency across occasions
- High-performing gift categories
- Expanding demand in Tier-2 and Tier-3 cities
- Stable delivery performance

Areas of improvement:

- Increase marketing focus on underperforming occasions (Valentine's Day, Diwali)
 - Optimize delivery efficiency for bulk orders
 - Introduce product bundling to increase average order value
 - Expand promotional campaigns during low-sales months
-

🚀 Business Impact

This dashboard enables data-driven decision-making by helping stakeholders:

- Identify high-revenue opportunities
 - Optimize inventory and supply chain
 - Improve marketing strategy across seasons
 - Enhance customer targeting and segmentation
-

🔧 Tools Used

- Microsoft Excel
 - Power Pivot
 - Pivot Tables
 - Data Model
 - Charts & Slicers
-

Final Note

This project demonstrates how data visualization and business intelligence tools can transform raw transactional data into actionable insights, enabling better strategic planning and improved customer satisfaction.
